### REASONS FOR ALLOWANCE

1. Claim 9 is allowed.
2. Claims 1-8 and 10-21 are cancelled.
3. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of a method for generating a random number comprising steps of: operating a plurality of flip-flops in a meta stable state, generating a random bit if one of flip-flops enter the meta-stable state; preventing the generation of a random bit if more than one of plurality of flip-flops enter a meta-stable state within a predefined time interval; providing an input signal for a first flip-flop and inverting the input signal for a second flip-flop as cited in the independent claim 9.

The closest found prior art is Epstein (U.S. 6,631,390). Epstein discloses a method for generating a random number comprising steps of: operating a plurality of flip-flops in a meta stable state, generating a random bit if one of flip-flops enter the meta-stable state; preventing the generation of a random bit if more than one of plurality of flip-flops enter a meta-stable state within a predefined time interval. However, Epstein does not disclose the inversion of the input signal of the first flip-flop for a second flip-flop.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
